TTW S

Table trolley, variable length

Any length up to 2000 mm. One trolley.

TTW S

The TTW S is a trolley for storing and moving folding tables horizontally. Its telescopic frame adapts to the table size: the platform length can be chosen freely for each project, up to 2000 mm.

The frame of black powder-coated square steel tube consists of two halves connected by inner tubes and a star-knob clamp, so the trolley is matched exactly to the length of the folding tables. Four castors with solid rubber tyres, two of them with a locking brake, and a push handle let a single person move it with ease.

Telescopic frame · length matched to the table top

TTW S with MDF platform and push handle

TTW S — Specifications

- mobile
- platform length freely selectable up to 2000 mm
- telescopic square steel tube frame
- 4 castors, 2 with brake
- stacks up to 10 tables
- load capacity up to 700 kg
- suitable for folding tables

Dimensions

Platform width	700 mm
Platform length	freely selectable up to 2000 mm
Platform height	260 mm
Height incl. push handle	1010 mm
Castors	ø 150 mm
Load capacity	700 kg
Stacking capacity	10 tables

Material

Frame
Square steel tube 40 × 40 mm, telescopic, black powder-coated

Push handle
Steel tube, black powder-coated

Platform
MDF panel 20 mm, natural

Castors
4 castors ø 150 mm, solid rubber tyres, 2 with brake
