

C 18

Foldable training and conference chair with castors or glides

Tip up. Nest together. Gain space.

Conference · Meeting Room

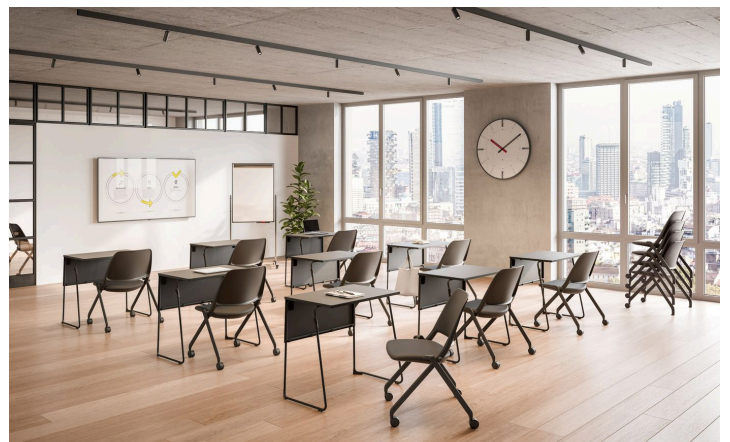

C 18

The C 18 is a lightweight training and conference chair with a plastic shell on an X-leg steel tube frame. The seat automatically tips up against the backrest when vacated, so several chairs can be nested together to save space.

An integrated clip connects neighbouring chairs into stable rows. The frame is available with glides or castors, the C 18 with or without armrests. Optionally the seat can be fitted with an upholstered fabric pad. The construction is tested to ANSI/BIFMA X5.1 for stability, load and durability.
