

C 26

Stackable chair with row-linking system

Flexible in rows. Practical when stacked.

C 26

The C 26 is a versatile stackable chair with a steel frame — lightweight, robust and designed for quick setup and breakdown. The translucent plastic gliders with integrated row connector enable easy, stable row formation without tools. Optionally available with castors and an upholstered seat pad.

The C 26 combines classic stackability with practical row-linking: the translucent plastic gliders click directly into each other and keep chair rows securely in place — ideal for event spaces, training rooms and seminar areas.

The steel frame is available in chrome or powder-coated finish. The C 26 can optionally be fitted with soft castors for smooth floors. An optional seat pad in fabric, faux leather or leather increases sitting comfort during longer events.

With a compact stacking footprint, many chairs can be stored in a small space — ideal for rooms with changing seating requirements.

C 26 — Specifications

- stackable up to 6 units on floor
- row-linking integrated in gliders
- optionally with castors
- optionally with seat pad

Dimensions
