

C 90

Colourful shell chair with seven base variants

One shell. Seven colours. Seven bases.

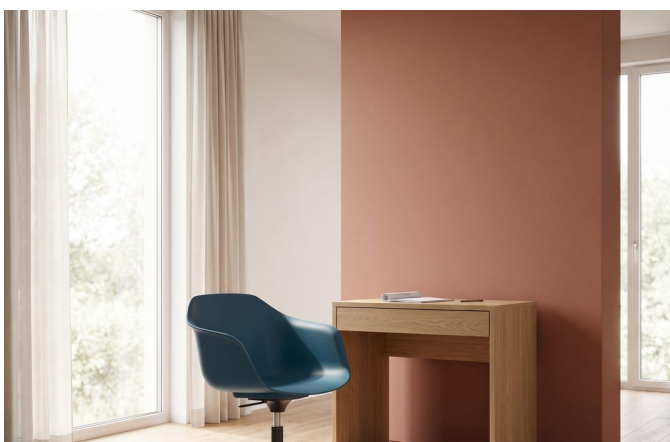

C 90

The C 90 is a versatile shell chair made of glass-fibre reinforced polypropylene, available in seven bold colours and either as a solid-coloured or upholstered version. The seat shell can be combined with seven different base types – from the classic 4-leg stacking chair in metal, plastic or solid wood to a sled base or a height-adjustable swivel chair.

The C 90 combines an organically shaped, light seat shell with a modular system of seven base variants – so the chair can be tailored precisely to meeting rooms, reception areas, education settings or workspaces. The shell, made of UV-stabilised polypropylene (PP + GF), is available in seven colours, from classic black and white to blue, brick red, mustard yellow and sage green – on request also as an eco version made of recycled material.

Base options include a 4-leg stacking base in steel tube (Ø18mm, black,

C 90

white or chromed), a lighter 4-leg plastic base, a base in polished solid beech wood, and a stackable sled base (Ø12mm). For conference and office areas there are also three swivel base variants: a fixed swivel base with glides, a fixed swivel base with twin castors, and a height-adjustable swivel base with gas lift and 5-star castor base.

Every base variant is available either with the solid-coloured shell or with an upholstered seat/back (fabric of choice). The C 90 is certified to EN 16139:2013 for contract use.

C 90 — Specifications

- seat shell in seven colours, on request as an eco version made of recycled material
- seven base variants: 4-leg in metal, plastic or solid wood, sled base, fixed swivel base (glides or castors) and height-adjustable
