

CTW 10

Chair transport trolley

One stack. One person. Rolling.

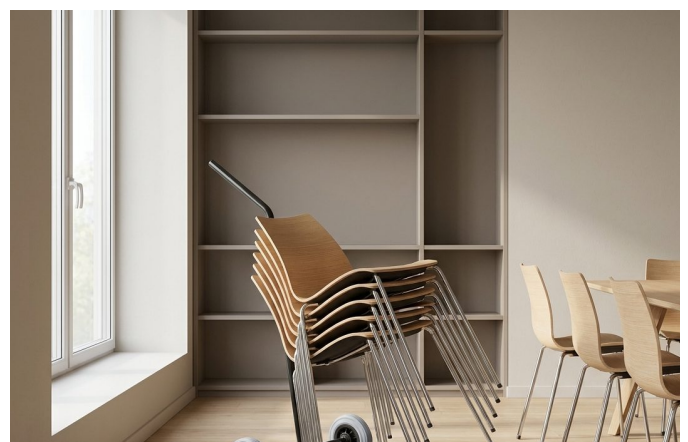

CTW 10

The CTW 10 is a compact chair transport trolley based on the hand-truck principle: the blade is pushed under an already stacked chair tower, the two transport wheels let the stack tilt slightly backward, and one person can move it safely.

The alysee CTW 10 moves a stack of unupholstered stacking chairs effortlessly through corridors, foyers and storage rooms. The flat steel blade is pushed under the rear chair legs; once the trolley is tilted back slightly on its two transport wheels, the blade carries the weight of the entire stack, while the front chair legs only touch the floor again once the trolley is set down.

The continuous push handle made of round steel tube sits at a comfortable height and allows precise, fatigue-free manoeuvring even in narrow corridors. Frame and blade are made of powder-coated steel, built for continuous use in commercial projects.

CTW 10

The CTW 10 is the compact entry-level solution in the alysee transport trolley range, alongside the larger CTW 20 (up to 45 chairs) and the CTW 30.

CTW 10 — Specifications

- rollable
- for stacked unupholstered stacking chairs
- hand-truck principle with tilt function
- 2 transport wheels
- continuous push handle

Dimensions

Blade width	approx. 550 mm
Handle height	approx. 1000 mm
Wheels	approx. 125 mm

Materials & Colours

Frame and blade

Steel, powder-coated, black

Wheels

2 transport wheels, solid rubber tyres, grey

Frame Colours

Black
