

FT 244 HV

Electric height-adjustable bench workstation

Sit. Stand. Work together.

FT 244 HV

The FT 244 HV is a back-to-back bench system with electric height adjustment. Two facing workplaces share a common H-frame – for ergonomic sitting and standing work at the touch of a button.

The H-frame made of rectangular tube carries two opposing tabletops, which can be raised and lowered synchronously or independently. The stepless electric motor adjusts each side from 625 to 1275 mm – making the FT 244 HV suitable for all body types and working modes.

Tabletops are available in melamine, HPL, linoleum or veneer; the frame in white or anthracite. Acoustic desk screens in many colours create visual and acoustic privacy in open-plan offices. Cable management, monitor arms and power strips integrate seamlessly.

FT 244 HV — Specifications

- electric height adjustment 625–1275 mm
- back-to-back: 2 workplaces on shared H-frame
- synchronous or independent adjustment of both sides
