

FT 54 HV

Electric height-adjustable centre-column table

One column. The whole room stays free.

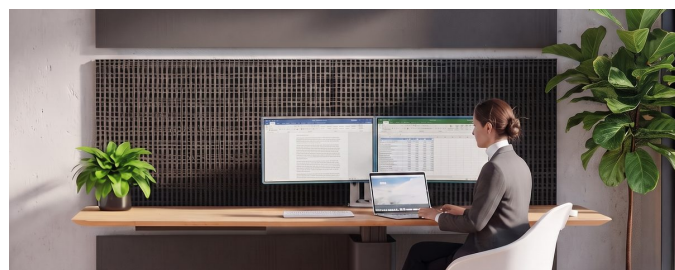

FT 54 HV

The FT 54 HV stands on a single central lifting column with a flat floor plate. Electrically adjustable from 693 to 1093 mm – from seated to standing height, with no table leg in the way.

Conventional sit-stand tables stand on two lifting columns and a frame. The FT 54 HV does not: it carries the top on one central column mounted on a flat floor plate. The space around it stays clear – you can approach from any side, arrange chairs freely and place the table in the middle of a room without a frame edge dictating how it is used.

Its 400 mm of travel covers the entire working range: at 693 mm it is a low meeting table, at 720 mm a workstation at standard height, at 1093 mm a standing table.

FT 54 HV

Changing between them is electric and stepless at the touch of a button – one piece of furniture for seated and standing work, with no reassembly and no tools.

The frame comes in two versions. Free-standing, a flat floor plate carries the column, so the table can be repositioned at any time. Wall-mounted, the floor plate is omitted: the column is carried by a wall frame, leaving the floor completely clear and easy to clean in one pass. Travel is identical in both cases because the same column does the work; with wall mounting, the installation height determines the range the table moves through.

For larger tops and long meeting tables the top is mounted on two bases; several units can be linked in rows to form conference tables. Tops are available square, rectangular and round, 25 mm thick with an 80 mm corner radius, in melamine, HPL, linoleum or veneer. Floor plate and column casing come in black, white or aluminium grey.

FT 54 HV — Specifications

- electric height adjustment 693–1093 mm (400 mm travel)
- centre column instead of a frame: clear legroom from every side
- frame either free-standing on a floor plate or wall-mounted without one
- single base, or twin base for large tops
- linkable in rows to form conference tables
- 25 mm top with 80 mm corner radius, square, rectangular or round
- cable routing inside the column
- floor plate in black, white or aluminium grey
- legroom to DIN EN 527-1
- optional battery operation – no fixed power connection needed
- optional acoustic desk screen and add-on top

Dimensions

Height adjustment	693–1093 mm
Travel	400 mm
Top thickness	25 mm
Corner radius	80 mm
Square top	1200 × 1200 / 1400 × 1400 / 1600 × 1600 mm
Rectangular top	750 × 1200 mm
Round top	Ø 1400 mm
Top on twin base	1200 × 2400 / 1200 × 2800 mm
Floor plate	800 × 800, 900 × 600 or Ø 800 mm

Height figures apply to the free-standing version with floor plate. The wall-mounted version has no floor plate; travel remains 400 mm and the height range follows from the installation height. Further top formats and custom shapes on request. Several units can be linked in rows to form larger meeting and conference tables.

Materials & Colours

Lifting column

Telescopic steel column, electric motor-driven, with internal cable routing

Floor plate

Steel, powder-coated black, white or aluminium grey

Wall mounting

Steel wall-mounting frame, powder-coated (alternative to the floor plate)

Column casing

Sheet steel, powder-coated to match the floor plate

Tabletop

Melamine, HPL, linoleum or veneer, 25 mm

Desk screen

Acoustic fabric on frame (optional)

Frame Colours

Black

White

Aluminium grey
