

FT 122 R

Flip-top folding table on castors

Open. Closed. Rolled away.

FT 122 R

The FT 122 R is a proven flip-top folding table on the K10 rollbase. The tabletop folds vertical with a single action – compact to store, quick to set up. Ideal for schools, administration, congress and event venues.

The FT 122 R combines robust everyday reliability with maximum flexibility. The proven K10 rollbase with four swivel castors allows effortless transport through narrow corridors and doorways. The flip-top mechanism folds the tabletop vertical – multiple tables can be parked compactly in storage or along a wall.

The tabletop is available in standard widths from 700 to 1800 mm and depths from 600 to 800 mm. Available in melamine, HPL, veneer, linoleum or Fenix NTM. Edges square or solid wood edge. Custom shapes on request.

Accessories such as table connectors, media modules and matching TTW transport trolleys complete the FT 122 R into a full seminar and event system.
