

HC 10

Bar stool from the C 10 family in wood and steel

Timeless. At bar height. From the C 10 family.

HC 10

The HC 10 brings the ergonomically shaped beech or oak plywood shell of the C 10 family to bar height. Four-leg or sled steel-tube frame, chrome-plated or powder-coated, with an all-round footrest. Optionally fully upholstered in fabric, leather or faux leather.

The HC 10 is the bar-stool variant of the proven C 10 family: the same ergonomically shaped 10.5 mm plywood seat shell, spring-loaded in the backrest area, now brought to bar height. The steel-tube frame is available as a fixed four-leg or sled base — both with an all-round footrest for secure and comfortable footing.

Chrome-plated or powder-coated in any RAL colour, the shell is available in natural beech, oak veneer or black-stained finish. Optional seat cushion or full upholstery in fabric, leather or faux leather — as already used in numerous bar and lounge projects.

Matches the C 10 chair family for consistently designed projects from the conference room to the hotel bar.

HC 10 — Specifications

- Bar height (seat height approx. 750 mm)
- Four-leg or sled frame
- all-round footrest
- optional full upholstery (seat or complete cover)
