

HC 30

Bar Stool

The C 30 shell, now at bar height.

Bistro · Bar Counter

HC 30

The HC 30 brings the organically shaped seat shell of the C 30 to bar height — same shell geometry, same seating comfort, now at standing and bar level.

Two frame variants are available: the four-leg steel tube frame looks clear and modern, while the sledge frame makes the stool appear filigree and floating. An upholstered seat panel is available on request. The HC 30 finds its place at the bistro counter, in lounge areas, at standing tables and in the canteen.
