HT 39.2

Standing table with free-standing solid wood legs

Three or four legs. One clear statement.

HT 39.2

The HT 39.2 is a standing table on individual solid wood legs. Each leg is slightly angled and fixed separately under the round top — with three or four legs, in oak or black.

The HT 39.2 relies on a reduced system of individual legs: each solid wood leg is turned conically, angled slightly outward and screwed to the underside of the top with a black steel plate. A steel corner brace stiffens each leg against the top. The legs come in two finishes: oak (water-based lacquer) and black.

The table can be made with three or four legs. The round top is available in Ø 700, 800 or 900 mm in white, black or oak (melamine, HPL, linoleum or veneer). At about 1050 mm table height the HT 39.2 is a standing table for bar, reception, break area and standing meetings.

The HT 39.2 adds a tall variant with its own free-standing leg design to the T 39 and LT 39.

HT 39.2 — Specifications

- Individual legs in solid wood, conical and slightly angled
- Three or four legs to choose from
- Legs in oak or black
- Round top Ø 700–900 mm in white, black or oak
- Fixing plate and corner brace in black steel
- Height-adjustable glides
