

HT 5

Standing table for conference and communication

Flexible in shape. Open in space. Always in conversation.

HT 5

The HT 5 is a versatile standing table for conference areas, communication zones and open-plan offices. Tapered steel legs, numerous tabletop shapes and integrated media connectivity make it the all-rounder for modern work environments.

Standing tables create space for quick discussions, spontaneous meetings and focused work at standing height. The HT 5 meets these needs with design restraint and technical versatility.

The frame features tapered steel tube legs – a slim, timeless profile, available chrome-plated or powder-coated in black (RAL 9005) or white (RAL 9010). The space-saving folding function allows quick combination of larger conference layouts or compact storage.

Tabletops are available in seven shapes: rectangular, boat-shaped, ellipse, rounded, trapezoidal, circle and circle segment. Standard thickness is 25 mm, optionally with a solid wood edge in 50 mm or 70 mm height.

HT 5

Surfaces in melamine, HPL laminate, Fenix NTM, linoleum and other decors available.

Optional with castors, various modesty panels and comprehensive media integration: POWER FRAME media module, cable tray, cable management and table connector TC 7.
