

T 121

Conference table with load-bearing frame

Modular. Precise. Representative.

T 121

The T 121 is a high-quality conference and meeting table programme based on the K120 frame system. Column-shaped steel legs with stable cross-brace — compatible with all common table top shapes and sizes. Also available as multi-part arrangement with intermediate support K121.

The K120 frame system forms the foundation of the T 121: solid steel columns with flat base plate, connected by a stable cross-brace, support table tops in all desired shapes — rectangular, boat-shaped, trapezoidal or as a segment.

For larger conference arrangements, the intermediate support K121 (INTERMEDIO) provides the necessary support for long table tops from approx. 3,200 mm. The table-to-table configuration (T-T) enables flexible setups for group workstations and seminar arrangements.

Frame chrome-plated or powder-coated. Table tops in chipboard, MDF or lightweight core, 25 mm thick, with wood edge or ABS. Surfaces in melamine, HPL, veneer, linoleum or high-pressure laminate.

T 121 — Specifications

- Column frame K120 — chrome-plated or powder-coated
- Intermediate support K121 for tables over approx. 3,200 mm
- Table-to-table configuration (T-T) possible
- all table top shapes and sizes
- cable management and media integration on request

Dimensions

Table width	600 – 1,660 mm
Table length	custom
Table height	approx. 740 mm
Top thickness	25 mm

Custom sizes, table shapes and edge profiles on request. Intermediate support K121 recommended for lengths from approx. 3,200 mm.

Options

- Intermediate support K121 (INTERMEDIO)
- Table-to-table configuration (T-T)
- Cable management
- Media module
- Table connector
- Front panels
