

T 170

Stackable seminar table with hook system

Set up. Stored. Always ready.

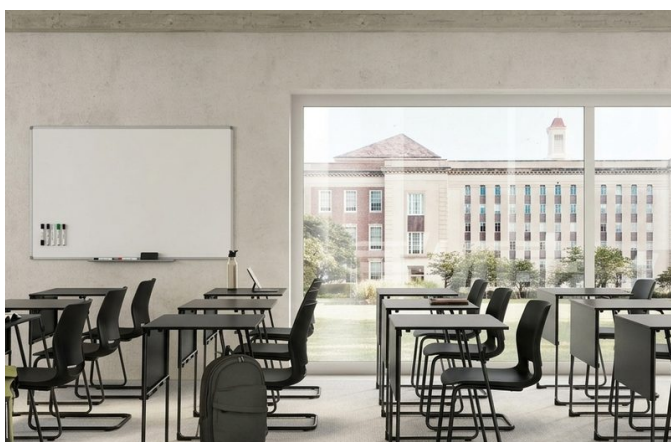

T 170

The T 170 is a lightweight seminar table with an integrated hook system for direct stacking. Sled frame chrome-plated or black powder-coated, tabletop 750 × 500 mm with ABS edge. With the CTW 170 transport trolley, store up to 20 tables in minimal space.

Set up fast, stored even faster: the T 170 is designed for maximum efficiency at seminars, training sessions and events. The profiled sled frame in steel tube is chrome-plated or RAL 9005 black powder-coated – both variants combine robustness with a clean, timeless appearance.

The integrated hook system allows direct nesting without any tools – up to 5 tables can be stacked by one person without effort. With the optional CTW 170 transport trolley, up to 20 tables are moved and stored safely, without handling individual tables.

The 20 mm tabletop (750 × 500 mm) has an all-round ABS edge and is available in all standard melamine decors. A side privacy panel protects from view and gives the table a clean, high-quality appearance.
