

TTW R

Transport trolley for round tables

Round. Safe. Rolling.

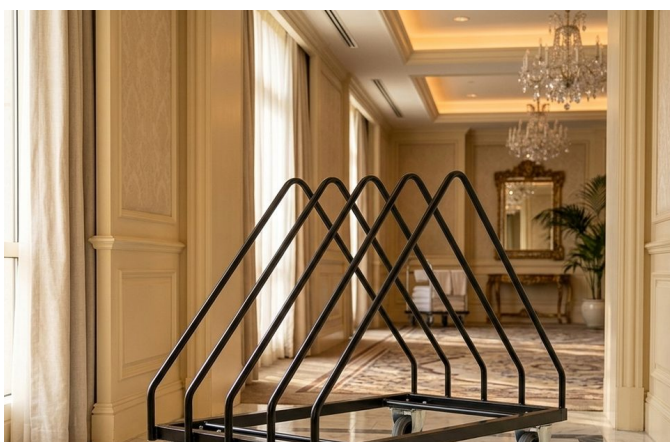

TTW R

The TTW R transports round table tops upright and space-efficiently – up to 4 folding tables or 8 table tops per trolley, safely guided by curved steel arches. Four swivel castors allow effortless manoeuvring even in narrow corridors.

The alysee TTW R was developed specifically for transporting round table tops. The characteristic curved steel arches hold the tops securely upright and prevent lateral tipping. Up to 4 folding tables or 8 table tops can be transported in a single trolley – space-efficiently, safely and by one person.

The base frame of powder-coated steel tube is robust and easy to maintain. Four swivel castors allow precise manoeuvring even in narrow corridors and storage areas.

The TTW R is available in various sizes for round table tops from ø 1200 mm to ø 1800 mm.
